

QAP Seminar May 2026

Qiskit Fall Fest 2025 Event and Outcomes

Natalie Hawkins
Founder, QFF Lead Organizer
Seattle Quantum Computing Meetup (2022-present)

Century of Quantum

Qiskit Fall Fest 2025, a Seattle Community Event

Schedule and materials:

https://github.com/SeattleQuantumComputing/Meetup/qiskit_fall_fest_2025

The Numbers

Winning Certificates: 4
Participant Certificates: 18

Total Number of
Registrants over 9 Events: 94

Stimulated: sharing by the
participants of their learning
(Python talk, article, mentor, LI)

The Events

- Qiskit and QC 101
- Kickoff
- Happy Hour
- Work Party
- Physics Nobel Prize 2025
- Beginner Notebook Walkthrough
- Zoom Kickoff
- Follow-up on Questions

The Participants

- Software Engineers
- Project Managers
- Quantum Curious
- Community Mentor
- Former IBMer

Event Locations

- Seattle Public Library (5)
- Community Center (1)
- Local Brew House (1)
- Meeting Space (1)
- Zoom (1)

Why?

1

I am all-in on Quantum Computing.

2

I would like to attend something like this to learn more about QC and to meet other interested people.

3

It didn't exist.

4

It's a win-win-...-win -> for me, for the participants (near and far), for Seattle, for Quantum Computing, ..., for IBM.

What?

<https://www.meetup.com/seattle-quantum-computing-meetup/>

https://github.com/SeattleQuantumComputingMeetup/qiskit_fall_fest_2025

What made it successful?

The Seattle Quantum Computing Meetup group on meetup.com attracts eyes.

Flexibility was allowed on the type of participation, and the participants chose different paths to the Winning Certificate:

- 1) coding
- 2) article writing
- 3) project proposal

Each event allowed newcomers to join at any point, and, so, did not depend on attending any previous events.

Participants liked being able to get a certificate from IBMQ.

- Fun, friendly, caring environment
- Interesting presentation content
- Followed-up on questions asked
- IBMQFF-branded slides look nice
- IBMQFF Coding Challenges provided nice coverage of Qiskit
- An IBMQ-like Attendee Guide was helpful
- Zoom catches additional audience

What next ?

People are interested in:

- 1) QC skills related to jobs
- 2) Working on a project together – so maybe I could focus more on the hackathon topics and make those easier for participants

Thoughts:

- 1) Narrow focus with #1 and #2 above in mind
- 2) “Practice Makes Perfect” – with experience, I feel that I improve, and will automatically adjust when hosting future events
- 3) “Courage to Start” – with #2 in mind, it’s good to just get started!

Events ran from:
Sep. 30 – Nov. 14, 2025

Most events were exclusively in-person in Seattle, WA.

One event was exclusively on Zoom.

Most of the participants live in the Seattle metro area.

Two events were ancillary quantum events in the community which occurred during the QFF window.

Our QFF was hosted on github on the Seattle Quantum Computing Meetup org page, and advertised at:

<https://www.meetup.com/seattle-quantum-computing-meetup/>
